

Kyeto Logistics Group – Company Overview & Kyeto Fleet Management Division (KLG)

Company Overview

Kyeto Logistics Group (KLG) is a leading-edge logistics and technology company headquartered in Dubai, specializing in the digitization and optimization of transportation operations across frontier and emerging markets. Our mission is to create transparent, efficient, and secure supply chain solutions by integrating logistics, telematics, AI, and data analytics.

KLG operates on a “power-first, profit-later” strategy: we aim to control national transport flows, digitize customs and container movements, and provide governments, transporters, and importers with live operational insights. Our core business includes:

1. Digital Logistics Operations

- Container transport management from port to final destination.
- Marketplace for trucks and importers with real-time pricing and escrow payment.
- Integrated dashboards for brokers, importers, drivers, and government agencies.

2. Fleet Management & Telematics (Kyeto Fleet Management Division)

- Subscription-based solutions providing real-time vehicle tracking, driver monitoring, asset management, and operational intelligence.
- AI-enabled safety and driver coaching systems.
- Fuel management, diagnostics, and workforce optimization modules.

3. Tech & Data-Driven Services

- AI-powered dashboards for fleet and transport management.
- Compliance tracking, ESG monitoring, and fraud prevention.

- Integration with ERP, TMS, insurance, and customs platforms.

Through these services, Kyeto Logistics Group is positioned as the first-mover in building a transparent, GPS-driven logistics ecosystem in Africa's frontier markets, starting with the Democratic Republic of Congo (DRC).

Kyeto Fleet Management Division (KLG) Overview

The Kyeto Fleet Management Division is a strategic extension of Kyeto Logistics Group, designed to provide end-to-end fleet management solutions. This division targets transport companies, mining and oil/gas fleets, SMEs, NGOs, and government clients. It is built to replicate and exceed global industry leaders like Cartrack, which operates in 24 countries with a \$2B valuation, by delivering integrated GPS tracking, telematics, AI safety, and operational intelligence.

This division is central to Kyeto's growth strategy, providing predictable, subscription-based revenue streams even during slow logistics periods, while driving customer retention and operational excellence.

Core Services

1. GPS Tracking & Telematics

- Real-time vehicle location and route monitoring.
- Geofencing with alerts for unauthorized movements or route deviations.
- Driver identification and activity logs.
- Historical trip and performance data analysis.

2. Fuel Monitoring & Analytics

- Real-time fuel level monitoring through tank sensors or CANbus integration.
- Fuel theft detection (siphoning or unexplained drops).
- Consumption analytics to reduce operational costs and optimize fuel efficiency.

3. Driver Behavior Monitoring & Coaching

- Harsh braking, acceleration, and cornering alerts.
- Driver scorecards with per-trip and per-driver performance analytics.
- Real-time coaching for safety improvements and risk mitigation.

4. AI-Powered Safety Cameras

- In-cabin and cargo area cameras with live streaming.
- Incident recording for accidents, theft, or rule violations.
- Automated driver behavior alerts (fatigue, phone usage, seatbelt compliance).

5. Maintenance & Diagnostics

- Engine health monitoring and predictive maintenance alerts.
- Diagnostic trouble codes and service reminders.
- Integration with operational dashboards for proactive fleet management.

6. Asset & Trailer Tracking

- Real-time tracking for trailers, containers, and non-powered assets.
- Geofencing, tamper alerts, and asset utilization analytics.
- Reports for ROI optimization and resource allocation.

7. Workforce Optimization

- Task assignment, route planning, and real-time updates to drivers.
- Scheduling and performance monitoring.
- Reporting dashboards for operational decision-making.

8. Risk Management & Compliance

- 24/7 stolen vehicle recovery support.
- Regulatory compliance tracking and automated reporting.

- Carbon footprint and ESG monitoring for corporate clients.
-

Integration with Kyeto Logistics Group

The Fleet Management Division operates seamlessly alongside KLG's logistics operations, providing end-to-end solutions from port to delivery. Integration ensures:

- **Operational Synergy:** Fleet management data flows directly into KLG dispatch and marketplace platforms, optimizing container movements and trucking efficiency.
 - **Revenue Diversification:** Subscription-based telematics and SaaS modules provide recurring revenue independent of logistics contract volumes.
 - **Enhanced Customer Retention:** Comprehensive solutions foster stronger relationships with transport companies, NGOs, SMEs, and government partners.
 - **Data-Driven Insights:** Analytics on fleet utilization, driver performance, fuel efficiency, and compliance guide both internal strategy and client recommendations.
-

Strategic Importance for Sales & Growth

The sales team for the Kyeto Fleet Management Division is central to achieving market penetration and sustainable growth. Sales will focus on:

- **Wholesale & Enterprise Sales:** Large fleets, mining and oil/gas companies, government departments, and SMEs.
- **Bundled Solutions & Upsells:** Promoting packages that combine GPS tracking, AI safety, fuel monitoring, and compliance modules.
- **Marketplace Integration Awareness:** Educating clients on the value of KLG Dispatch & Marketplace platform for route optimization, live pricing, and digital escrow payments.

Sales success metrics will include subscription adoption, upsell of modules, fleet coverage, and revenue generated per account. The division's predictable, recurring revenue model allows the sales team to focus on long-term client relationships and enterprise-level contracts.

Why This Division Matters

- Positions Kyeto as the go-to provider for fleet transparency, operational efficiency, and driver safety in the DRC and frontier Africa.
 - Provides a stable, recurring revenue stream supporting the broader logistics business.
 - Enables government and corporate adoption through compliance, data-driven insights, and safety assurance.
 - Establishes a replicable model for expansion into other frontier markets, scaling both the logistics and telematics ecosystem.
-

In One Line

(KFM)

The Kyeto Fleet Management Division (KLG) transforms fleet operations in the DRC by delivering integrated GPS tracking, driver safety, fuel monitoring, AI-powered insights, and compliance tools, enabling transporters, importers, and government agencies to operate with efficiency, transparency, and predictability.

KLG Dispatch provides real-time GPS tracking and marketplace-based truck routing from ports to main cities, ensuring live pricing transparency, efficiency, and on-time delivery.
